TOWN WARRANT.

THE STATE OF NEW HAMPSHIRE.

*To the Inhabitants of the Town of Raymond, in the County of Rockingham, in said State, qualified to vote in Town Affairs:*

You are hereby notified to meet at the Odd Fellows' Hall in said Raymond on Tuesday, the ninth day of March next at ten of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary town officers for the year ensuing.
2. To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriations of the same, as follows: For maintenance of the poor, for support of schools, for laying out and repairing highways, and building bridges and repairing same and for all other charges arising within the town.
3. To see what sum of money the town will vote to raise to pay the fire company.
4. To see what sum of money the town will vote to raise for Memorial Day purposes.
5. To see if the town will vote to make a discount of three per cent on all taxes paid on or before June 15, 1920.
6. To see if the town will vote to accept state aid for trunk line construction.
7. To see if the town will vote to accept the provisions of Chapter 117, Laws of 1917, on section of the Raymond-Plaistow road, so called, and appropriate or set aside from the amount raised for highway work the sum of \$100 for this purpose.

8. To see if the town will vote to raise the sum of \$100 for the purpose of coöperating with the state and federal government in the control of the white pine blister rust in Raymond.

9. To transact such other business as may legally come before said meeting.

Given under our hands and seal this sixteenth day of February, in the year of our Lord nineteen hundred and twenty.

WALTER J. DUDLEY,

T. MORRILL GOULD,

FRANK FOLSOM,

*Selectmen of Raymond, N. H.*

## REPORT OF WATER COMMISSIONERS.

The water system remains about the same as previously reported. The expense has been somewhat in advance of last year, owing to necessary repairs that were obliged to be made.

Complaint was entered of rust in the water, which necessitated a thorough cleaning of the stand-pipe. It was thoroughly scraped, cleaned and painted inside and out. This should properly protect it for several years to come.

The pump at the factory was not in a condition to use at all. This called for numerous new parts, and a man from Walworth Mfg. Co. was sent here to install them. The pump is now in first-class condition and will do all of the work required of it.

Two thousand, three hundred and thirty feet of new pipe has been laid through the cemetery. Where the old pipe formerly supplied only the old part of the cemetery, the pipes now extend through the whole lot. To our minds, this part of the system should not be neglected.

The above expenditures call for an outlay of over \$1,000. Outside of these, the expense of the system has been small.

The receipts from water-takers shows a decrease, owing to the number of vacant tenements. The amount of uncollected water bills is very small and will be available in a short time.

The list of bills approved and balance sheet follow.

### BILLS APPROVED BY THE WATER COMMISSIONERS.

J. W. Dodge:

Services as water commissioner

from April 27, 1917, to

March 12, 1918. .... \$12.50

Faucet for cemetery ..... 1.50

Services as water commissioner

for 1918 ..... 15.00

----- \$29.00

## SCHOOL ORGANIZATION.

## SCHOOL BOARD.

E. W. Smith, Chairman      Lewis O. Pollard, Secretary  
Ralph Sanborn

## SUPERINTENDENT OF SCHOOLS.

Albert T. Lane, Colby College, A. B. 1895; A. M. 1901;  
Harvard University, Courses in Education, 1909.

Address—Raymond, N. H., Box 92.

Telephone, Raymond—33

Monthly meetings of the school board are held on the second Monday evening of each month from 7.30 to 9 p. m. at the new school building in the superintendent's office. All parents and citizens who have business relative to the public schools will at these meetings be given opportunity to confer with the school board and the superintendent. On every Monday evening of the month except the second, at the same time and place, the superintendent

will have office hours for conference with parents and citizens on all matters relating to the education and welfare of the pupils or to the administration of the schools, and for the reception of any persons who may desire any information concerning the certification of minors seeking employment and the naturalization of aliens.

#### SCHOOL BOARD REPORT.

Required annual report of school board to district, stating amount of money needed for support of schools and for statutory requirements (see Laws of 1919, 106:21).

1. Amount of money required by law (\$3.50 on each \$1,000 of the 1920 inventory).
2. Statement in detail of the additional amount of money required for the support of schools, and payment of statutory obligations for the ensuing fiscal year.

I. *Budget (School Money).*

	Elementary Schools.	High Schools.
(a) For support of schools. (This is school money and may be used for maintaining schools, including the purchase of fuel and other supplies, the transportation of pupils and incidental repairs not exceeding 5 per cent of school money.)	\$8,250.00	\$4,000.00
(b) For purchase of textbooks and scholars' supplies .....	400.00	350.00
(c) For the purchase of flags and appurtenances ..	10.00	.....
(d) For the payment of tuitions at high schools and academies .....	.....	.....
(e) Total amount required for above items.....	8,660.00	4,350.00
(f) Estimate of amount of a \$5 tax on the 1920 inventory .....	4,400.00	.....
II. <i>Requirements to Meet Budget.</i>		
(a) For support of elementary schools.. (If the amount required for elementary schools is more than the amount of a \$5 tax—the amount of a \$5 tax should be reported—otherwise the amount required.)	4,400.00	
(b) For support of high school or payment of high school tuitions.... (Ordinarily, districts that support a high school do not pay tuitions. Both items might be required.)		3,000.00
Total for support of all schools (school money) .....		\$7,400.00

III. *School Board, Report of Assessment Required.*

(1) For the support of schools and the purchase of required books, supplies and flags, and the payment of high school tuitions.

Estimate of \$3.50 tax, \$3,080, on 1920 inventory.

(2) For the payment of the per capita tax (statutory) .....	500.00
(3) For the payment of debt (statutory) .....	1,250.00
(4) For the payment of interest (statutory) .....	1,350.00
(5) For salaries of district officers and expenses .....	175.00
(6) For new equipment .....	200.00
(7) For repairs and miscellaneous....	150.00
(8) For expenses of administration....	150.00

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

*To the School Board and the Citizens of Raymond N. H.:*

Herewith I submit my seventh annual report and the thirteenth in the series of reports of the superintendents of the school district.

As was stated in last year's report, the administration of the public schools has become exceedingly difficult. The growing scarcity of teachers is one of the greatest problems of the time. Alarm has been shown not only by educators but also by governors, state legislators, town and city officials throughout the entire country. Unless our schools can have a constant supply of well-trained, competent teachers of high character, undoubted patriotism and mental and moral power, the very foundations of our free institutions will be menaced by the threat of ignorance and the loss of those priceless liberties for which so much

blood and treasure has been spent, not only by our forefathers but also more recently by the heroes of the World War. Without education and training, or even with education of inferior grade, there will arise a new generation, unfitted to face the perplexing problems of the future.

Not only must we raise salaries, for teachers cannot be purchased like articles of clothing or food, but we must improve the living conditions, show the teachers the respect to which they are entitled, lengthen their tenure of position, encourage professional improvement and find the means to secure for them time and opportunity for summer study. The superintendent must as never before lend every effort to train his teachers so that they will be rendering the best service of which they are capable to the community and to the children under their charge. This district and the districts nearby must raise its teachers.

In an address Commissioner Butterfield has said:

"It should see that it has enough girls in the upper grades and in the high school on their way to the Normal schools or colleges to supply its own annual loss. We want New Hampshire girls for these New Hampshire positions and New Hampshire positions for these girls. They in the long run are the only teachers who will stay with us, will take a real interest in our towns and will succeed in educating our children."

Not only the expense of instruction but the cost of maintenance and operation of the school plant has been increased. In Raymond a large advance in expenditure for current purposes has not been necessary this year because of purchases wisely made in anticipation of increase cost.

Previous recommendations which have been put into effect are: the painting of the domestic arts house, to harmonize better with the main building, the enameling of two of the sinks, one in the laboratory and the other in the boys' basement, the installation of electric lights throughout the main building and in the domestic arts building, also of an electric bell in the high school corridor

to signal the beginning and the end of recitation periods, the placing of several additional layers of cement on the basement floor. The provision of a bubbler in the boy's basement, the grading of the grounds in front of the main building, the setting up of a new flag pole, the purchase of a new flag. For the manual training department a few necessary repairs on the Pecker building were made and some additional equipment was supplied. For the high school, a new Remington typewriter has been purchased, reference books to equip the courses in science and history have been obtained. The old piano formerly in the Pecker building has been tuned and placed in the high school assembly room. The high and grammar pupils have been supplied with copies of an excellent collection of patriotic, folk, lyric and sacred songs. It is hoped that better facilities for musical instruction can be secured in the years to come. Music has come to be regarded as one of the subjects with which every well-trained boy and girl must have some acquaintance.

The work of the domestic arts department has constantly shown results. This department deserves a much greater and more appreciative recognition on the part of the citizens and especially the parents of the young ladies who are taking these courses. Home making is fundamental and essential. The noon luncheon has once more become a healthful and pleasing feature in each day's schedule. The sewing and cooking departments are desirous to be of as much service to the community as possible. On a limited scale cooking for nearby homes can and has been done. So far as time and circumstances permit the cutting and fitting of garments and such sewing as will accord with the educational needs of the classroom can likewise be done for those who wish it.

In September a new course in domestic arts was begun. Household organization is the first of two Senior High general courses, covering the planning and organizing of a home by a young woman of average or limited income.

The girl draws careful plans and makes estimates of costs either for remodeling an existing house, preferably her own home, or for constructing a new but inexpensive house such as she might desire to live in on an annual income of \$1,200, including a lot of land large enough for a garden, 50 feet by 100 feet or larger. The many problems of painting, tinting, papering, heating apparatus, kitchen equipment, bathroom fixtures, laundry arrangements, the furniture and furnishings, the decorations, the vegetable and flower gardens are thoroughly discussed and related to real life. Due regard is paid to economy in the purchases made and in the arrangement of rooms and equipment.

The planning of the garden becomes an actual project and the girl "will actually plan, plant and care for a home garden."

Another new course offered this year to the junior high pupils of classes III and IV is commercial geography and history. This involves a careful study of the development of business and commerce from the earliest days to the present; of the trade routes in the different periods of history and of those of the present day. Reference book study, local investigation of industries and occupations, correspondence with manufacturers, importers, United States consuls, governmental departments in Washington, the collection of information from all over the world, the study of foods, of clothing, building materials, transportation, and especially of the local industries are some of the features of this practical and excellent course.

By arrangement with the Amoskeag Co., a pleasant and fruitful trip was made by teacher and class to Manchester and the day spent in studying at first hand the processes and methods of manufacture on a large scale as well as the organization and management of a concern employing so many laborers.

Similarly the class in Constitutional History attended a session of court at Portsmouth to observe methods of procedure. The purpose and aim is to make the work of the

schoolroom more practical, more vital, more related to real life.

Manual training has been given to three grades—Elementary VI and Junior High I and II.

The lower grade has completed one taboret, which involved varied requirements, and also built a foot-stool, upholstered and finished completely.

In Junior High I, each pupil designed and completed a more elaborate taboret and folding round-top work table. In this grade the completed product was carefully judged. Harold Houle was awarded first place in this grade.

In Junior High II, each pupil completed a taboret and is at work upon a Morris chair, which will be completed by the end of the year. In this year Lester Davis, Raymond Smith and Fred Dearborn were awarded the reward of the best work on their product.

When the prevalent sickness of the fall and winter of 1918-1919 is taken into consideration, the record of last year in attendance and in tardiness was fairly good. The high school had six tenths of one case in tardiness per pupil as compared with three per pupil for the average of all the high schools of the state.

Since September, 1919, in spite of the earnest and persistent endeavors of teachers, head master, superintendent and board, there has been a larger number of absences and tardinesses than heretofore. Many of these are infractions of law. Parents, on whom rests the greatest burden of responsibility, can remedy the situation by instilling into the minds of their children the great importance of promptness as a life-habit and the irreparable folly of neglecting educational opportunities so freely given.

Last June the second Senior High School graduation was held in the Congregational Church. The program is printed elsewhere with this report. Two young men and two young women were graduated with honor. One young man entered New Hampshire College in September and commenced work in the electrical engineering course. Two of the others expect to resume their studies later.

In December a meeting of parents and citizens was held in the assembly room of the High School to enjoy a community sing, to afford an opportunity for parents and teachers to meet one another, to learn something of the work done by the schools, and to organize some form of public school association. Another similar gathering will be held in March. It is hoped that closer coöperation of parents and school teachers and officials and a better understanding of the aims and the purposes of the new law, of school methods and procedure may be effected by giving some opportunity for the free exchange of ideas.

Satisfaction and civic pride should be shown by the citizens of Raymond for the accomplishments of their schools during and since the period of world conflict.

Raymond was one of the first communities in the state to establish, equip and maintain a full-fledged junior high school, to build up a school system with a six year elementary program and a six year secondary program inclusive of four years of junior high and two years of senior high courses and offering five of the nine curricula suggested by the State Department of Education. Every detail of these programs has been carefully inspected and approved by the State Department.

The formal approval for the present year has been received and is now in possession of the school. Four years ago the Raymond school board, upon recommendation of the superintendent, adopted these programs as the standard of attainment in our local schools. At the last annual district meeting a formal approval of these programs was voted. Since that time a very important declaration of the educational policy of the state has, to her honor and fame, been placed upon the statute books, and the programs we have used and the standards we have already set have (last August) been approved by the new state board as the models for all school systems of the state. A considerable number of cities and towns have already reorganized, and many other cities and towns are now in

the process of development along these lines. Ought we not to feel a sense of pride in having carried through so worthy an undertaking?

In spite of many drawbacks and unfortunate vicissitudes, we have maintained a fairly high level of work. We have housed our pupils in a modern, sanitary, well-equipped building on a site that is unrivaled. We have introduced and maintained excellent privileges for the vocational branches outlined in the programs of study. We have been able to supply teachers of the best educational training and competent talent for this work. Not all communities have been so fortunate. Some high schools have been unable to maintain all their departments largely because of inability to secure satisfactory instruction. It is with great satisfaction that we learn that last year the classes in French II, French III and Latin III exceeded the State minimum requirements and the chemistry class performed more than one hundred experiments as compared with the required minimum of sixty.

The addition of one more teacher, whose work has been the teaching of Business and Commercial subjects, to junior high and grammar pupils, of the history classes of elementary grades five and six and of the classes in United States History I and United States History II, has made the work of grammar and junior high classes more effective.

Physical drill is now required in all schools of the state. It has been made a part of the daily routine in both elementary and secondary grades of our schools. A beginning was made in medical inspection this year. The pupils have been thoroughly examined by a competent physician, and defects have been reported to parents. The superintendent urges every parent to assist in this work and where any defect is reported, to seek to have the child receive proper medical treatment.

It is confidently hoped that next year the employment of a school nurse may be provided for in the assignment

of state aid. A follow-up system with a trained nurse who visits the parents and aids in securing remedial treatment cannot fail to produce the results we seek.

Under the new law, the school districts were re-combined into supervisory unions by the State Board. Supervisory Union Number 53 is made up of five towns—Auburn, Candia, Chester, Deerfield and Raymond. Raymond, as the residence of the superintendent, becomes the center of the Union. The other towns, if they fulfill the intent of the recent legislation, will soon have schools organized along the same lines as our own. The geographical location and size would preclude any likelihood of their developing senior high schools. With increased facilities of instruction and equipment, the number of pupils who will leave these schools to enter high schools will certainly increase. Already a number of boys and girls are preparing to enter Raymond High next year. As the class who will pass from the sixth grade to the junior high is one of the largest in our schools, it is plainly evident that we shall have to provide more room for their accommodation.

We now have six tuition pupils from four different towns. With some inducement and proper encouragement the high school should show a considerable increase in tuition pupils for the next three years. Some good plan for providing additional room will have to be devised before next September. Some time in the future we should have a building near the domestic arts house and connected with it by a passageway.

This building should be built with a large high basement, which can serve as a playroom for the younger pupils and as a dining hall whenever needed by the domestic arts department. On the first floor one or two rooms should be used for the primary grades and a larger room for the wood working shop. This would make it possible to devote one or more of the elementary grade rooms to the uses of the junior high classes.

## RECOMMENDATIONS.

The construction of a good combination physics and chemistry table cannot be delayed longer, as chemistry will be offered again next year. The woodwork and the walls of the new building should be given attention.

As recommended last year, "a comprehensive plan for laying out playgrounds and athletic fields on the school land should be drawn up, adopted and a start made in putting into effect at least a portion of the plan." Can we not arouse the citizens to some form of concerted action this coming spring—lay out playgrounds and provide them with necessary equipment?

Three activities have been made parts of our routine school work in connection with the teaching of health and hygiene, conservation and thrift, industry and production.

The Health Crusader movement is one of the best features of New Hampshire Tuberculosis Society's plan to rid the state of unnecessary and preventable disease. The score chore sheets for recording the pupils' actual practice of hygienic habits and insignia used to indicate gradations of excellence help in making the work effective.

The School Garden Army will soon begin its campaign to have every boy and girl in the public schools cultivate home gardens.

The War Savings Societies have developed into permanent Happy Jack Thrift Clubs. Not nearly enough interest in these activities is shown by pupils and parents.

As a parent, as a patriotic citizen, will you not encourage your child to do his full share in these three directions?

Your attention is called to the various financial statements, statistical tables, the roll of honor, and the reprint of the five curricula of the high school program. Conditions of admission to the high school are added, as they were omitted last year.

In conclusion, I wish to express my gratitude to the loyal and industrious teaching staff, to the members of the

school board for their continued and reliable coöperation, and to the parents and the citizens who have helped in many ways to make our schools more efficient.

Respectfully submitted,

ALBERT T. LANE,

*Supt. of Schools.*

#### MEDICAL INSPECTION.

*School Physician, Dr. J. C. Tappan, Chester, N. H.*

Dates of Examinations—January 5, 7, 9, 1920	
Number of pupils examined.....	138
Number of exclusions on account of communicable diseases .....	124
Number of card notices to parents.....	124
Number cases found of:	
Anaemia .....	1
Nervous disease .....	1
Skin disease .....	4
Defective teeth .....	104
Adenoids .....	33
Unvaccinated .....	59
Unvaccinated without proper excuse.....	45
Other defects:	
Mouth breathers .....	2
Middle ear inflammation.....	1
Cardiac .....	2
Malnutrition .....	0
Pulmonary disease .....	1
Orthopedic defects .....	1
Hypertrophied tonsils .....	72
Gland diseases (enlarged).....	4
Defective vision .....	24
Defective hearing .....	9
(Of these cases of defective hearing, 5 had hypertrophied tonsils and 4 had adenoids)	

Nystagmus .....	1
Strabismus .....	3
Conjunctivitis .....	1
Acute inflammation of middle ear.....	1
Sanitary condition of school building, yard and surroundings—excellent.	

The following monthly and weekly magazines are used in connection with the courses pursued in the elementary and secondary schools: *The Literary Digest*, *The Outlook*, *St. Nicholas*, *The Electrical Experimenter*, *The Popular Science Monthly*, *Current History*, *National Geographic*, *Red Cross*, *American Cookery*, (*National School Review*).

To the above may be added single copies of the following periodicals purchased as needs arise: *The House Beautiful*, *the Nation's Business*, *The Granite Monthly*, *Review of Reviews*, *The World's Work*, *House and Garden*. In the French language: *L'Illustration*, *Je Sais Tous*, *Le Pays de France*, *Les Annales*, *Lectures Pour Tous*.

## CONDITIONS OF ADMISSION TO THE JUNIOR HIGH SCHOOL.

*Program of Studies for the Secondary Schools of New Hampshire—Page Forty.*

“To a secondary school, organized on the six-six plan, pupils may be admitted who have completed the work of an eight-four system and may complete the work in five years. They will be admitted to Class II and would take for the first year Science I, Science II, French I, Mathematics I and Mathematics II. In classes III and IV, they would do regular work, with extra work in French. To a school organized on the eight-four plan, pupils may be admitted who have completed the elementary work of a six-six system and may complete the work in five years. They would be admitted to Grade VIII and would take United States History with both seventh and eighth grades and the other usual studies of the eighth grade.”
